

FYREPEL Firefighter Turnout Gear

When firefighters respond, there's no time to waste. Speed is essential. They go with what they know best. That's usually **Fyrepel's Attack Series** of turnout gear, recognized everywhere by its traditionally styled 35" full length coat worn over rugged, suspended, reinforced pants with double waistband, flapped hip pockets and take-up strap.

It's a proven design that's proven all the time ... on the job, day after day. Our balanced, tapered design allows superior weight distribution for more comfort, less fatigue. The 3-piece pattern permits a highly adaptable fit to accommodate anyone in the house, and can be tailored to meet your specific requirements and your budget.

Fyrepel design provides 360° vapor and thermal torso protection. Individually sewn, all seams are double-stitched with Nomex® thread, double lappes for extra durability and strength.

The **Attack Series** gear can be customized to meet or exceed stringent **NFPA, OSHA, CALOSHA** and exacting state requirements. Choose from two standard outer shell fabrics; Nomex® and PBI/KEVLAR®, and three standard linings: Aralite®, Nomex® Batt and Nomex® Felt. Available as an optional liner is Gore-Tex® coated E-89 vapor barrier quilted to a 3 ounce Nomex® pajama check. Suits are available in sizes Small, Medium, Large; other sizes are available at an additional cost.

**Leave your team's defense to
Fyrepel. It's proven every day.**

Attack Series Features

Collar - Tapered 6" at edges, 4" at middle (15.24 cm x 10cm) collar with Nomex lining multi-layer construction including vapor barrier

Shoulder and Yoke Area - double outer shell fabric reinforcement provides extended durability in high wear areas.

Throat Tab - protective double material outer shell 10"W x 4"H (25.40cm x 10.16cm) band with 2"W x 2"H (5.08cm x 5.08cm) Velcro® strip closure.

Wristlet - extra long 3.5" (8.89cm) Kevlar® knit sewn to outer lining provides unique water-well design and added hand/wrist protection. Nomex wristlet optional.

Metal Attachments - non-sparking rust-proof nickel-plated brass for safety and dependability.

Storm Flap - extra wide 4.5"W (11.43cm) flap with durable, multi-layer construction. Four leather backed, reinforced dee-ring and spring snaps make for positive closure.

Pockets - Two oversized 10.5"W x 4"L (26.67cm x 10cm) pockets feature double material reinforced bottoms and overlapping flaps with leather backed snap closures.

Inner Pockets - 7"W x 9"L (17.78cm x 22.86cm) pocket constructed of thermal liner & vapor barrier material; located on front left.

Suspenders - 8 point heavy duty 1.5"W (3.81cm) elastic with adjustable non-slip clasps (optional)

8 Point Suspender Buttons - aluminum, leather-backed and reinforced for durability.

Waist Band - 2"W (5cm) double waistband

Take-Up Strap - rugged leather construction, with Dee-ring and spring snap for precise 2" (5.08cm) waist adjustment. **Hip Pockets** - two 7"W x 8.25"L (17.78cm x 20.96cm) pockets, with large overlapping flaps and heavy duty, reinforced snap closures.

Front Fly - tapered 5.5" at top to 2.5" at bottom (13.97cm x 6.35cm), double outer shell material, with overlapping design and snap closures.

Trim - fluorescent Scotchlite® or Reflexite® custom packages available in a variety of patterns and colors.
