## uvex airwing 9762

### uvex airwing 9762

New safety helmet system with unique ventilation. Large ventilation zones on the front and back provide excellent circulation of fresh air. They are individually adjustable right up to closing completely, and can therefore be adapted to any working environment. With its streamlined spoilers, airwing is a cut above the rest, and is also incredibly light.

Interior with 6-Point-textile suspension harness

Complies with norm: EN 397

The uvex airwing is also available without ventilation zones (fully closed) for working with electrics. It also complies with supplementary standard 440 VAC.

**Art. no.: 9760**

Colours – the last three figures of the article no. – as in the margin.

**Art. no.:** 9762.020  
**Colour:** white
