

Responder 4-C Rechargeable Personal Lights

A unique and revolutionary design features an interchangeable power supply. The Responder can be powered by either a 4.8-volt Ni-Cad rechargeable battery pack or four C-cell Alkaline batteries - a must-have power option for professionals on the job. With the rechargeable pack, the Responder Division 2 provides more than 2 hours of continuous light and a quick charge time of 2 hours. Get called to another emergency before you have time to recharge? Simply unscrew the battery cover, remove the rechargeable pack and replace it with four C-cell Alkaline batteries and you immediately have five more hours of light out put!

Light easily snaps into a charger which can store the light when not in use. The Responder is UL safety-approved and has been designed to be lightweight and rugged. It is water-resistant and weighs less than one pound. The Responder can be carried comfortably in the hand, worn on a shoulder strap or clipped to a belt or pocket.

The Responder beam is pre-focused and the unit features two spare bulb holders. The oversized push button switch allows easy, one-handed operation even with gloves!

Responder offers you a range of models, chargers and accessories to meet your needs. Light includes Ni-Cad rechargeable battery pack, stainless steel coat clip and split ring.

- 500221 -- Division 1 Responder with Ni-Cad Battery Pack and QuickCharger II with 120V AC and 12-24V DC Plugs

- 500305** -- Responder - Division 2 listed light with 4 C-cell Alkaline batteries

QuickCharger II

The Responder will not overcharge. If you accidentally place your light in the charger while the Alkaline batteries are loaded? Don't worry. The charger has been specially designed not to charge when Alkaline batteries are loaded. So no harm will be done to your Responder unit. Spare battery pocket charges extra battery.
